

## ABSTRACT

A process of making a liquid ink comprising the steps of:

(a) dissolving a polymer comprising units derived from at least a nitrogen-containing polymerizable monomer in a solvent with a Kauri-Butanol number greater than 30 to form a

5 polymer solution;

(b) dispersing colorant pigment particles in said polymer solution to form a colorant pigment dispersion;

(c) removing at least some of said solvent from said colorant pigment dispersion to form treated colorant pigment particles; and

10 (d) dispersing said treated colorant pigment particles in an organosol containing a carrier liquid having a Kauri-Butanol number less than 30.
